

Ultimate  
Water

## SUSTAINABILITY POLICY

- No more transportation and storage of dangerous chemicals
- Clean Salt and Fresh water are the only inputs
  - Pure chemicals with no additives

### Purpose

Ultimate Water believes that our focus on reducing our impact on climate change will make us a leader in the pool industry's efforts to shift into sustainable and environmentally friendly best practices. Ultimate Water's sustainability policy is pervasive throughout the company, from waste reduction manufacturing practices to seeking partnerships with those whose environmental and sustainability policies are aligned with ours.

### Scope

Ultimate Water's Sustainability Policy ranges and applies to the entire company, from manufacturing to sales.

### Policy

Ultimate Water is dedicated to the reduction of commercially manufactured chemicals, reducing the impact of industrial chemical manufacturing and the eventual human exposure. The core of that dedication comes from the engineering and design of our products, comprehensively erasing the need for manufacture, transportation, and storage of industrially manufactured chlorine, muriatic acid, calcium hypochlorite, and other sanitation chemicals produced on a mass scale. We maintain that commitment through our business practices from manufacturing waste reduction practices to packaging sustainability reviews.

As a young company, our sustainability-centered corporate culture is paramount to establishing goals that continue to look further and further into the future as we continue to evolve our goals and set an example for other new companies in our industry. Our 2023 commitments are:

As a young co
